

Community Care Use Cases.

Communication in care homes, home care and community services is incredible important, but can sometimes be difficult to achieve. Here are some of the ways Pando can help.

Safety

- Remote workers are required to check-in at the beginning and of end of shift. This can be done as a quick message rather than by phone call.
- Checking in with colleagues at the beginning and end of potentially risky or difficult visits.
- Staffing issues

Communication

- WhatsApp replacement
- Clear communication channels for those who work alone, which increases the feeling of being supported
- Managers feel like they have eyes on and can see the conversation and updates in real-time

Information sharing

- Community teams typically have a laptop or tablet to access EHR. This is cumbersome and time-consuming. They use pando to ask colleagues of info they need, retrieve it if already stored inpatient card etc

Photo sharing

- Wound care
- Equipment/Home assessments
- Care notes, typically kept in the individuals home
