

Pando Reinforces Public Sector Presence With G-Cloud 12

Article date: 30th September 2020

Clinical communications provider builds its NHS and Local Government presence via G-Cloud 12 framework

Clinical communications specialist Forward Clinical Ltd, trading as Pando, has been confirmed as an approved supplier to the [Government's Digital Marketplace](#) known as G-Cloud 12, the latest version of the Crown Commercial Service Procurement Framework for Cloud Services.

Continuing its track record in providing secure and compliant clinical messaging, the London based medical technology company has been working with many NHS Trusts across the UK to support the COVID-19 pandemic response.

Under the latest iteration of the flagship procurement vehicle, Forward Clinical is listed under [Cloud Software](#). Pando by Forward Clinical Ltd offers secure communication solutions for healthcare teams to collaborate within/across organisations. Trusted by +60,000 healthcare professionals, Pando incorporates best-in-class features that help professionals share clinical information securely, save time, and make better decisions. It is available for mobile and desktop use and is proven to replace WhatsApp and Pagers.

Barney Gilbert, Founder of Forward Clinical, said: "The G-Cloud framework is the de-facto method of purchasing for public sector bodies and it represents a great opportunity for technology providers to easily connect with key decision makers especially during the COVID-19 pandemic. We view this as a simple and effective way to help engage with those organisations.

Forward Clinical (Pando) are certified in:

- Cyber Essentials +
- DSP Toolkit (Standards Exceeded)
- Pando is hosted on Amazon Web Services in London in an ISO 27001 certified data centre.
